Casey,

The Dive Team is returning to San Jacinto in early April to place samplers and in early May to retrieve them. Is May too late for you?

We would appreciate a memo requesting support. I will forward you a very good example provided by Valmichael for San Jacinto.

I have a flight this morning, but will be available for a phone call this afternoon if you would like to discuss the timeline in greater detail. It is possible to consider completing this work in April, but I would need to discuss my distribution of workload with my management.

Subject: Dive Team Support Needed
Hi Brandi,

We are about negotiating a SOW with the USACE for a sheet pile assessment at the Bayou Bonfouca Superfund site in Slidell, LA. That SOW would have EPA providing divers for the underwater investigation. Nothing extensive, just checking the condition of the sheet pile under the water to the dredge line. As far as scheduling this is something that we would need this Spring – is that even possible before I move ahead with this SOW?

I know a memo requesting support has previously been required. Is if so, who's it addressed to?

Thanks,

Casey
